## FLUID 7 MK III & MK IV (EXTRA FLUID) POWER VARIABLE CAMERA HEAD

The Ronford-Baker Fluid 7 head is designed for use with either film or video/EFP cameras. Its two sealed fluid units allow control to be varied through seven stages, from a cushioned free movement to the heaviest control required, by the use of three simple on/off levers. Both pan and tilt actions are continuous through 360°, depending on the length of the lens and camera. The Fluid 7 can be supplied with a variety of platform widths, spacing blocks and riser plates as illustrated. The platform is adjustable for height to suit the centre of gravity of the camera in use. A second pan bar can be fitted to the left-hand side of the platform, with ratchet adjustment to suit the required height.

### Technical Specifications

Operational temperature range  
+150°F to -40°F (+60°C to -40°C)  
Weight: 17lb 14oz (8kg) standard

F7 Standard Head

- ▶ Fluid cushioned free head
- ▶ Sealed fluid system gives seven degrees of control in both pan and tilt
- ▶ Smooth accurate braking on pan and tilt
